ATLANTIQUE

SAISONS 3

The ATLANTIQUE awning embodies comfort and modularity. You'll love its generous 2.70 m depth, providing a comfortable and inviting living space. Designed for seasonal use, this awning is made with TRIGATEX 220 canvas, which is a breathable material that effectively delays the appearance of condensation. The central vent provides the ventilation you need for an optimal interior temperature. The subtle combination of removable, interchangeable walls with the removable 2-section front provide considerable modularity that you're sure to appreciate. To make sure every camping trip is a success, the pitching has been designed to be simple, with linked frame poles.
