

STANDARD BLINDS FOR
PROTECTION FROM THE EXTERIOR

FRAME MADE IN FRANCE

MONTREUX

SAISONS – 4 –

The MONTREUX is the ultimate all-season PVC awning for those who like to stay in one place. It has proven its high resistance and exceptional longevity. The anti-sag poles are a standard feature and ensure optimal roof support even in the snow. The seams on the roof, covered with a heat-sealed band, ensure total watertight seams and offer long-term protection. With a depth of 2.50 m or 3 m, this awning promises great times shared with friends and family in a spacious, bright living area. The large windows are fitted with external blinds. Its design has been specifically reworked to ensure perfect ventilation and insulation in all circumstances: ventilation under canopy, large mosquito screens and insulated canopy as standard.
