

PARTIEL

SAISONS – 4 –

Make the most of your camping holidays with a remarkable awning. The PARTIEL awning has been designed to fit the largest trailer tents as well as some mobile-home models. Combining classic style and unquestionable elegance, this all-season PVC awning has been designed for long-stay use, even under extreme conditions. The large windows are fitted with external blinds enabling the windows to be completely closed and protected. The double-slope roof, designed from a single piece of material, facilitates the opening of the door, and contributes to the perfect run-off for rainwater. The PARTIEL awning meets the resistance requirements for year-round use, with its frame with reinforced corners.
